

G. Fred Lee & Associates

How We Assist Clients

As described on our website (www.gfredlee.com) in the “[About G. Fred Lee & Associates](#)” section, *G. Fred Lee & Associates* is a specialty environmental quality consulting firm that provides high-quality, client-specific, technical support in the evaluation and management of impacts of chemical contaminants – including toxics, carcinogens, aquatic plant nutrients – on

- water quality
- aquatic life
- public health.

Drs. G. Fred Lee and Anne Jones-Lee and are the owners and technical principals of the firm and personally conduct the work on behalf of clients. They are both former university professors who taught and conducted research in graduate school programs at several US universities; Dr. Lee was on university faculties for about 30 yrs, and Dr. Jones-Lee for 11 yrs. In 1989 they shifted their professional focus to full-time, private consulting. Their service to a diverse client base includes

- sources, significance, fate, and control of contaminants
- contamination investigation, problem identification and scoping
- remediation prescription and evaluation
- litigation support

in matters concerning

- solid and hazardous waste impact evaluation and management
- water supply water quality
- water and wastewater treatment
- stormwater runoff quality
- sediment quality
- control of chemical contaminants in fresh and marine waters and groundwaters.

Their expertise and experience extend to work on impacts of contaminants in

- fresh waters – lakes, reservoirs, rivers
- marine waters
- estuarine waters
- stormwater
- sediments
- saturated and unsaturated groundwater
- solid and hazardous waste impact evaluation and management.
