

Stormwater Runoff Water Quality Science/Engineering Newsletter Index

The Stormwater Runoff Water Quality Science/Engineering Newsletter was first issued on June 2, 1998. Since that time, on the average of about every two months, a 5- to 15-page issue of the Newsletter has been made available. At this time, over 500 pages of discussions of stormwater runoff water quality impact evaluation and management have been presented through the Newsletter. Over the past year, the number of individuals who receive the Newsletter has been about 7,500.
